

We say NO to government healthcare as it will end up costing the middle class more money, give us substandard care and force us to make poor decisions based on your actions. We almost like our health care as it is and since Obama ruined our inexpensive health care. We still don't like it as much as our pre-Affordable Healthcare Act plan. That more than doubled our premiums so we had to change our plan to a lesser one we could afford. All you representatives do is break things that are working good for working people. Government run healthcare WILL BE A DISASTER. We urge you to NOT pass this legislation.

Rick Vitti
