

No to SB 842

The state of Connecticut is already the highest taxed state. We already have welfare programs , insurance included. Welfare is where most of the money goes , other than our defunct 'education' system. The Democrats have already proven they can't or won't spend or allocate money correctly. We are one of the smallest states with the most taxes and it is still never enough. Did anyone learn anything from Obama care .. little to no research and development, exorbitant premiums that cover nothing, so people forgo treatment, hospitals and doctors offices closing in the areas they are most needed. Waiting lists to get treatment, if at all. Raising drug prices. Ultimately the government determines who lives and who dies. That is not healthcare , that is killing people.

Alana Wallace
