

No to SB 842!

No public option for health insurance especially with taxpayers on the hook for excess losses and covering illegal aliens. It's bad enough we're a sanctuary state. Your goal is single payer healthcare that will do nothing to improve our medical system.

I'm sick and tired of this state doing nothing to reduce taxes and make our state more attractive to people and businesses. Look at the outmigration! I wouldn't blame insurance companies for leaving the state if this passes.

Take a look at states where businesses and people are moving and follow their lead!
