

How many times do we have to be told Government can do things better? How many politicians tell us we can keep our plan and keep our doctors. Obama's BIG LIE. This is only the first baby step. The private sector answers our needs far better.

Now, the people have to be the backstop! With people leaving this high tax state with huge unfunded mandates, this will just keep the roads open for people to find new homes in far better managed states. Kiss more insurance jobs and insurance companies GONE.

Don Waterfield
