

As a concerned Connecticut citizen and voter, I am writing to offer my support for SB 842. I believe that this bill would improve the quality of life for all the citizens of Connecticut.

I was personally affected when I was laid off from my job in April of 2020 and was unable to pay for the essential antibody medication I needed, which without insurance... is nearly \$12,000 a dose. Having lapses in health insurance because insurance is only affordable under an employer plan is untenable. I urge you to approve this measure.
