

Dear Members of the General Assembly,

No, absolutely under no circumstances should the General Assembly create government-run health care in Connecticut.

The track record of the General Assembly is horrible, Connecticut is the poorest run State in the Country. I don't need to outline the record and report the debt that has been run up by the Assembly you are well aware.

This is an attempt to grab more power for politicians and redistribute wealth. We have Medicare, Medicaid and Obama Care. All poorly run and not solvent, not solvent intentionally to get us to single payer government run health care.

I have alerted all members of my family about this scheme, no one is in favor. We will be watching the votes and will vote against all members of the General Assembly that vote for this power grab.

Wayne Wright
