

Hello! I hope this finds everyone healthy and safe!

Connecticut has been known to be called the insurance state. Growing up, both my parents were employed at Aetna, and now as an adult married for almost 16 years I met my husband when we both worked at Aetna. He still remains employed at Aetna/CVS and I moved onto starting my own business. This is a huge industry in our state. It has provided me and my children a beautiful upbringing! Insurance industry employs so many people of all career paths from underwriters, accountants, IT professionals, etc. in Connecticut, we can't keep legislating ourselves out of jobs thinking this is the solution to a problem that was created by bad policy. Government has no business getting into the healthcare arena. We can't afford the future losses that will be incurred as a result of state run programs. This will also jeopardize the already fragile economy that has been saved from complete ruin by having the insurance capitol right here in Connecticut! We live in one of the most beautiful states in America, let's focus on economic growth instead of job killing ideas! Please vote no to SB 842!

Thank you,
Shannon Ziomek
