

Senators and Representatives should vote down H.B. 6447 and S.B. 842. We can't afford to drive the insurance business out of Connecticut. We need those jobs to support our economy. And, we CAN'T tax insurance policies and then complain about affordability! It's ludicrous. When I found out the state already taxes my insurance policy, I was shocked and dismayed. This is a case in point that shows what's wrong with Connecticut. These bad ideas should be stopped now.
