

I am writing in opposition to the following proposed bills in the CT Legislature...

HB6107, 6611, 6612, 6613

SB1024, 1026, 1027

It is our local towns who know best how to handle local zoning issues. Towns and cities here in CT have evolved after discussion and decisions made by local residents for over 300 years. The system may not be perfect...but no system is.

Every town and city is different. One size fits all plans rarely work. In addition, there are infrastructure limitations to some of the proposals that even money cannot change.

Please do not try to legislate against history and common sense.
