

I want to voice my complete opposition to state mandates Zoning as proposed in Bill Numbers (HB 6107, HB 6611, HB 6612, HB 6613, SB 1024, SB 1026, SB 1027)

These bills will adversely impact the environment including a long-term negative effect on the watershed by creating an undue concentration of population. It will destabilize property values and disrupt and overburden public services such as police, fire and schools that are carefully managed by each local community.

These mandates represent bad public policy and will destroy my right as a Connecticut resident and property owner in Easton CT. to contribute to and protect the environment where I and my family reside.

The State has historically demonstrated that it does not do better than the local community what is best for each town.

My Family and I are opposed to (HB 6107, HB 6611, HB 6612, HB 6613, SB 1024, SB 1026, SB 1027)

It's an attempt to eliminate local autonomy and create a "one size fits all" approach to our lives.

It is essential each town maintain Local Control & Municipal Home Rule, without it you will be robbing my community and others of the right to voice opinion and effect change in local matters.
