

We all believe that affordable housing is important. However, local government are the proper place for the power to control the zoning of their towns. Each town has unique infrastructure and environmental characteristics and history; and the local governments know what they are doing. We don't want to live with a "solution" from a group of politicians in Hartford. We trust ourselves and our neighbors who care about our town, city's people, environment, traffic and our future.

It is ridiculous and destructive and a terrible centralization of power into the hands of politicians who don't even live in the districts and neighborhoods which would be affected by this legislation.
