

I am an RTM representative from District 2 in Greenwich. I have received numerous comments from residents expressing concern about our town losing its control over zoning decisions. It is important for people who choose to reside in a specific town and financially support it to make those important decisions about maintaining the nature of that town. That includes providing affordable housing, the design and specifics which should remain with the town residents and not through state mandates. State mandates for zoning issues infringes upon and denies local citizens their freedom of choice.

I oppose bills HB 6107, SB1024, SB1027 and the other proposals which limit and restrict local zoning control and planning.
