

We are strongly in favor of HB 6646 which will provide assistance to affected homeowners. The bill seeks to:

- Allow homeowners to obtain a reassessment of their home that will remain valid until the foundation is repaired or replaced.
- Extend the life of the captive insurance company for individuals to submit claims until further legislative action is taken.

These are critical funds that provide the Connecticut Housing Finance Authority the required support to the captive insurance company for settling claims.

My wife and I recently found out that we have a crumbling foundation and it is devastating impact from both a financial and emotion basis.

This bill will provide a small amount of relief to cushion the blow due to this natural disaster which was caused by no fault of our own which has encumbered one of largest assets.

Kind regards,
Dan and Laurel Carmody
