

It is important that reassessments of value remain in effect until a home's foundation is replaced. The home has no value until the foundation is fixed and the tax reduction can help the homeowner afford to fix the foundation.

It is important that the Captive Insurance remain funded and active until all home and condominium foundations are fixed. As the owner of a condominium affected by crumbling foundations in all 6 of our buildings we would not have been able to fix our foundations without the assistance of the Captive Insurance and 34 homeowners would have lost their homes. The financial impact to homeowners is tremendous and they need the help tax reassessments and the Captive Insurance give them.
