To Whom it May Concern:

I am a licensed clinical psychologist in CT and am writing in strong support of bills SB1022 and HB5596.

Over the past year I have been using telehealth almost exclusively, providing psychological services during hundreds of client sessions.

It is my professional opinion that telehealth produces equivalent therapeutic outcomes to that of more traditional therapy delivery methods and, therefore, should be recognized and equivalently reimbursed by third party payors.

Sincerely,

Andrew P. Tucker, Ph.D., FAASM
