To the Public Health Committee

Please accept my amended testimony to include evidence of a strategic effort that has been made to post fake reviews against pregnancy centers. These reviews are not made by actual clients which is in violation of Google's reviews policies. Honestly, this was the first year a member of the committee acted so unprofessional and accusing me of being personally deceptive. Perhaps a public apology is in order.

We resolve to review all the fake clinics in the U.S. so that they will stop deceiving pregnant people.
