RE: Opposition to S.B. 835

Dear Public Health Committee members:

I strongly oppose S.B. 835 because it targets non-profit organizations that provides support to women and children, giving an alternative to abortion that abortion clinics are not able to provide. There are already consumer protection laws in place that protect people from false or deceptive advertising; no further legislation is necessary.

Care Net of SECT is one pregnancy center that I support financially. Its website clearly states that they do not provide or refer for abortions and the staff members I have met are honest and sincere people. The services provided are free and allow women to make an informed choice.

Please oppose S.B. 835 and stop this persecution of faith-based ministries that are desperately needed in Connecticut. Thank you for your consideration.

Yours respectfully,

Elin Hill
