

I am very much in favor of allowing manufacturers to set up dealerships for EV in CT. I bought my Tesla online in 2019 and picked it up in Kisco NY. Actually it was a very pleasant experience as handled by Tesla. The time has come to make the experience and the viability of buying and servicing EV in CT. The writing is on the wall for sure now since the other major players i.e. Ford, GM, Toyota, Jaguar, Volvo, and others are announcing they will be offering many style EV in a few years. There are many consumers who need to have a tangible way to buy an EV car inside our wonderful state. Tesla has shown the way and the day of ICE is going to be reduced to smaller volume sales. There are plenty of locations available for dealers to set up shop. Please move forward starting with Tesla and let them open stores in CT.
