

Dear CT legislature,

Please act to pass SB 127 allowing direct sales by EV manufacturers in our state. It is the height of idiocy to not use EVERY imaginable strategy to reduce the emission of greenhouse gases into the atmosphere. Climate change is having devastating impacts on the lives of every human being on the planet and everyone must do their part. The transportation sector is a major contributor to greenhouse gas emissions in our state and putting up roadblocks to the greater adoption of electric vehicles is beyond stupidity. Forcing CT consumers who desire the best electric vehicles to travel to NY State to acquire their vehicles is not only inconvenient but insulting and smacks of market manipulation.

Please do the right thing and pass this legislation immediately. We have waited far too long.
