
OLR Bill Analysis

HB 5451

AN ACT CONCERNING REVISIONS TO STATUTES CONCERNING THE COMPTROLLER.

SUMMARY

Current law allows retirees of the Connecticut Municipal Employees Retirement System (CMERS) to work for a municipality that does not participate in CMERS, but it prohibits them from participating in that municipality's retirement system. This bill eliminates the prohibition, allowing CMERS retirees to participate in, and earn credit towards, a non-participating municipality's retirement system.

This change makes the law's treatment of CMERS retirees who work for non-participating municipalities consistent with its treatment of CMERS retirees who work for the state. By law, CMERS retirees accepting state employment may participate in, and earn credit towards, the state retirement system.

The bill also eliminates requirements that the state comptroller report to the governor and General Assembly:

1. biennially, on the CORE-CT system, including on its status, total and projected costs, and any issues, and
2. annually for each fiscal year through FY27, on the amount of labor-management savings the state realized due to the 2017 State Employees Bargaining Agent Coalition (SEBAC) agreement and other agreements with individual state employee collective bargaining units specified in the state budget acts or adjustments.

Finally, the bill (1) requires the comptroller to publish solicitations for state employee payroll deduction slots (i.e., automatic payroll deductions for services a vendor provides) on the office's website, rather than in a newspaper, and (2) specifies that issuing these solicitations is

discretionary for the comptroller, rather than required.

EFFECTIVE DATE: October 1, 2022, except the provisions repealing the reporting requirements are effective July 1, 2022.
