
OLR Bill Analysis

sSB 213

AN ACT ALLOWING MEDICAL ASSISTANTS TO ADMINISTER VACCINES.

SUMMARY

This bill allows medical assistants to administer vaccines, under certain conditions, in any setting other than a hospital. They may do so only if they (1) meet certain certification, education, and training requirements and (2) act under the supervision, control, and responsibility of a licensed physician, physician assistant (PA), or advanced practice registered nurse (APRN). The bill specifies that it does not authorize employers to require physicians, PAs, or APRNs, without their consent, to oversee medical assistants administering vaccines.

The bill also makes a corresponding change by adding to the list of organizations from whom the Department of Public Health (DPH) must obtain a list of state residents certified as medical assistants.

EFFECTIVE DATE: October 1, 2022

REQUIRED CERTIFICATION, EDUCATION, AND TRAINING

To be eligible to administer vaccines under the bill, a medical assistant generally must be certified by the American Association of Medical Assistants, the National Healthcareer Association, the National Center for Competency Testing, or the American Medical Technologists.

The medical assistant also generally must have graduated from a postsecondary medical assisting program that is either:

1. accredited by the Commission on Accreditation of Allied Health Education Programs, the Accrediting Bureau of Health Education Schools, or another accrediting organization recognized by the U.S. Department of Education or

2. offered by a higher education institution accredited by an accrediting organization recognized by the U.S. Department of Education.

The bill's authorization also applies to medical assistants who do not meet the above certification and education requirements but who completed relevant medical assistant training provided by any branch of the U.S. armed forces.

The bill requires any medical assistant, before administering vaccines, to complete at least 24 hours of classroom training and eight hours of clinical training on vaccine administration.

LIST OF CERTIFIED MEDICAL ASSISTANTS

Under current law, the DPH commissioner must annually obtain from the American Association of Medical Assistants and the National Healthcareer Association a list of all state residents on each organization's registry of certified medical assistants. The bill extends this requirement to also include comparable lists from the National Center for Competency Testing and the American Medical Technologists. As under existing law, DPH must make these lists available for public inspection.
