

**Name:** Linda Dalessio

**Title:** Dr.

**Organization or Agency:**

**Topic:** HB06485 - AAC NATURAL ORGANIC REDUCTION AND GREEN BURIALS.

Opposes

**Testimony:**

Dear Legislature and Senators,

I write in strong opposition to Bill 6485. This is desecration and disrespect of the human body, with no regard to faith. That this Bill was even raised disgusts me as a Christian. We are made in God's image, would you throw away God for human compost. That you would propose to decompose and use human remains as "green organic reduction" shows me the utter contempt that you have for the human body and personhood. It also shows me how disconnected you are to your constituents of faith. Who exactly benefits from this? Do we need to use people as fertilizer now? Is this part of the World Economic Forum and the Fraudulent Green New Deal? The taxpayers in Connecticut will not benefit from this, and I will not pay for this. Companies that would benefit from this should not be allowed to give ANY testimony. They are not taxpayers, they are globalists. This Bill will allow another private-public partnership in Connecticut that does not benefit the taxpayers but would allow the "State" to bury disenfranchised people in this horrific way with no loved ones to advocate for them without any regard to their faith or wishes. We are NOT New York.

Thank-You

Dr. Linda Dalessio
