Municipal Impact: None

Explanation

The bill makes various changes to the statutes concerning the erasure of criminal history records. Many of the changes are not expected to have a fiscal impact to the state, however there is a cost to the Office of the Attorney General as described below and a potential cost to the Office of the State Comptroller. The bill may result in potential future costs to the adjudicated claims account to the extent that claims against the state are made and are successful.

Section 4 results in costs to the Office of the Attorney General (OAG) of \$45,000 in FY 24 and \$46,125 in FY 25, plus fringe benefits of \$19,269 in FY 24, and \$19,751 in FY 25, as it requires OAG to hire a part-time legal investigator to work with other entities to gather information

¹The fringe benefit costs for most state employees are budgeted centrally in accounts administered by the Comptroller. The estimated active employee fringe benefit cost associated with most personnel changes is 42.82% of payroll in FY 24.

about criminal history records.

This is a new enforcement action for the agency; OAG currently is not involved with criminal history records. Under the bill, the agency would have to substantiate that data was improperly disclosed by a company, and it is unclear if the agency is allowed to access records from the agency or provider to make this determination.

The Out Years

The annualized ongoing fiscal impact identified above would continue into the future subject to any changes to employee wages and benefits.
