

Dear Task Force,

I am asking to keep my name as anonymous, but if my testimony will be needed in the future, please first contact me.

The GAL I had and have is Rhonda Morra.  
She was involved during the divorce process and now postjudgment.

She did not do a single house visit during the 4 years, she saw my children 3 times only in her tiny office, she lied in Court about me without any evidence to confirm her words.

For example, my ex-husband filed a motion that I was unfit mother because according to him "I provided our 12 year old daughter a cell phone with more than 350 pornographic images" and Rhonda Morra was the one to tell the judge. In fact I never gave our daughter any phones at the time.

There multiple examples of lies like that.

Then I would get a bill from her stating she traveled to the children's psychologist office, she traveled to Court, etc.

I lost my job because of multiple motions and hearing and was on State assistance, but she requested the money and took me to Court about her fees and also charged me for her travel/presence in Court on those hearing about her fees only.

She insisted I never provided her any authorizations to speak with the professionals involved, while I faxed it first from my job and had a printed fax transmission report with her fax number on it.

She stated in her email to me that all my emails were going to Spam folder and being deleted about 6 months after she began working again in my case.

And now that my emails are not going to Spam anymore she either does not respond or if I get a response it states the following "I am not your attorney, please contact the opposing counsel directly" even though my email is about the children, not me.

Totally unprofessional. When I showed her email to me from my ex-husband calling me "B..." she told me : "So what, you never say this?"

I can go forever about that person who does not know anything about the children - she never experience being a parent in her life, but knows what's best for other people' children!

It's like if a male doctor was explaining to a woman how it feels to give birth. (I am not against men at all, it is just there are some things in life that belong to a certain situation). No prejudice.

I hope that task force will be able to find a way to regulate who can become a GAL and how they charge.

I lost all my pensions and now I am selling my house to survive because of her.
