Spending Cap Commission  
c/o Appropriations Committee  
Legislative Office Building, Room 2700  
Hartford, CT 06106

To Whom It May Concern,

I have been a resident of the State of Connecticut since 2003 and since that time have seen the state slip considerably as a desirable place to live and raise a family due to horrible mismanagement, specifically financial controls.

I support a spending cap and I believe the cap should include ALL pension and liability costs as part of the equation.

Connecticut needs to show its current and prospective citizens that it is serious about getting its fiscal house in order, otherwise we may find ourselves looking like upstate New York in the not so distant future.

Sincerely,

Tim Mahon
