

I am writing to submit my testimony for the School Security subcommittee.

- Standardize safety drills across the state
- Train all teachers, subs and volunteers in safety drills
- Educate the parents about the drills and what they mean. This will help solidify the importance to the children when home. Discussions can come from this information with the family at home.
- Utilize the security personnel (I know it will vary depending on budget) with mentoring programs, anti-bullying, etc.

Thank you,
