

Dear Legislators

I am absolutely appalled over all the nonsense gun legislation that is being pushed through in our state. None of it will save lives or could have changed what happened in the Newtown, Ct school. Guns are not the problem. A knife or a car or a club could have been just as horrifying. There are sick individuals out there that do these things. They are the problem. The good responsible citizen should not be infringed from defending themselves from the mentally disturbed. All these new laws will do is strip law abiding citizens of our 2ND amendment rights, make us more vulnerable to criminals that mean to do harm, and it turns innocent people into felons. We need and should have the best and latest technologies to defend our families, friends and property, not limits on how many rounds our guns can hold, or what type of gun it can be. I respectfully and strongly urge you to PLEASE OPPOSE any of this new reactionary anti-gun legislation.

The only real solution for our children to be safe in schools from insane people meaning to do the unthinkable is to allow teachers and administration (that are willing and want to) to carry concealed handguns to protect the kids. Another solution would be to have an armed security guard or police officer in every school. Our banks and money have armed guards, our airports are covered with security, why do some politicians insist that our children don't deserve similar protection?

If you must pass some sort of "feel good" legislation, a better start would be to ban the "GUN FREE ZONE" ; all that does is advertise that one of these locations is the perfect place for a criminal to make an easy attack and take advantage without resistance.

Again PLEASE OPPOSE any of this reactionary anti gun legislation. Please stand up and fight for the protection of the responsible law abiding gun owner, our Constitution and 2ND amendment!

Sincerely

George Walsh of Barkhamsted, CT
Voter and Responsible Citizen
