

Here is my suggestion for improving school safety.

Physical Upgrades, economical.

1. Lexan windows
2. Entry bars.
3. Concrete anti-car barriers (single flower pots) at doors with risk of vehicle intrusion.
4. Heavy duty doors in each classroom.
5. Sirens to mimic police en route panic buttons in various locations. With smart phone activation option.

Physical Upgrades, capital intensive

1. Double entry doors (airlock style) to reduce risk of follow in entry on main entry point.
2. Concrete barriers at playground entry points to eliminate high speed approach to yard.

Not full walling off.

3. Classroom door locks, with remote activation from office
4. Software to show hallway activity on classroom TV screens in cases of emergency.
5. Outdoor exits from each room.
6. Bullet proof partitions or desks in office.
7. Gunshot recognition systems with auto lock down and shooter location mapping shown on TVs.

Training

1. Instruction on remaining quiet in safe rooms, like bathrooms.
2. Teacher security training.
3. Taser availability by staff.

Legal Changes

1. Parental concealed carry allowed on school property.
2. Staff conceal carry.

I live near the Petit's and need to be able to defend my family from criminals.

Wait for police report prior to doing an unconstitutional gun grab.
