Subject: school safety opinion

When Diane Feinstein says “is this the way we want America to go?” the answer is – Face it, it’s already there.

We have 300 or 400 million firearms out there.

I doubt that more than a handful of Ct residents have ever visited the CT judicial Branch library website to read through the statutes. Even a partial reading can take hours.

The Connecticut Judicial Branch website

<http://www.jud.ct.gov/lawlib/law/firearms.htm> has a very long page of links to Statutes regarding weapons. These include [Sec. 29-37i. Responsibilities re storage of loaded firearms with respect to minors.](#) [8.2-10 Possession of a Weapon on School Grounds](#) , [8.2-23 Criminally Negligent Storage of a Firearm](#) and on and on.

We have plenty of laws.

These crazy people prey on the weak and defenseless. The school victims were slaughtered like lambs without any protection. They, at least, deserved a fighting chance.

Our children need protection in schools. We protect them and ourselves in most other identified target areas.

Locked doors are obviously not enough.

We should immediately craft and implement a test program of placing some trained armed response personnel in schools. Even if merely as a deterrent.
