

Dear Connecticut legislature department,

Recent talks have brought up some ideas toward school safety and new gun legislation. The thought of disbanding firearms; in simple words stupid, criminals will still get firearms whether the guns are legal or not. But I urge government not to make any sudden actions when it comes to new gun legislation.

In concerns with school safety I think it's. great idea to have state and local law enforcement to patrol schools to provide an extra level of security to the education system, and to limit access the schools with stricter security regulations that all the schools must follow should also be considered.

Please take your time an do not rush into new school safety or new firearms legislation. Thank you for taking the time to read this I would appreciate a phone call about any new details at (860)944-6801 or email me at tadjohnson1@live.com.

Sincerely

Tad M. Johnson Jr.
