

My name is Thierry Huck. I am a social worker at Wapping Elementary School in South Windsor. I have no concept of what this or any school would be like without a social worker. I currently have a caseload of 58 students that I support on a regular basis and another 200 or so plus 60 staff that I support on different occasions. The need for educating students on social skills, anger management and problem solving skills is of the utmost importance. If you do not have these skills how will you have the time and patience to learn how to read and write. We have to stop putting the cart before the horse and work as a community... this means having access to supports. We need social workers in our schools.
