I fully support the legislation proposed by CAGV. This gun-crazed country of ours has become an armed camp like no other developed nation on earth. We now measure our security in terms of the weapons we are allowed to possess.

The massacre at Sandy Hook Elementary School is only one manifestation of society held hostage by the gun industry interested only in their profits over the blood of children and anyone else caught by chance in front of a speeding bullet. The solution is not to arm more good guys to go after bad guys.

The solution is not more guns. One solution is strong legislation pending before your committee. A more far-reaching solution is to consider repealing the 2nd amendment.
