

The news stations didn't tell the whole story of the Newtown shooting.

Why did the mother have firearms in a house with a dangerously mentally ill Son?

Did the mother store the Firearms in a locked vault or cabinet so her son could not get access to them?

The State police released a list of the Firearms used in the Shooting. Guns such as a Glock 10mm and a Ismash 12 gauge shotgun are not the types of firearms a Women would purchase for herself due to the guns being large and having a large amount of recoil. It's very possible she bought them for her Son.

Please further research the whole story and relize that Connecticut has some of the toughest gun laws in the country and all were in effect that day and still none could have prevented that terrible shooting.

I have been a responsible Gun owner for 30 years. And take special pains to make sure all my transaction paperwork is done right. That my guns are stored properly locked. And that my family and friends are trained in the safe use and handling of firearms.

Don't make all of Connecticut's gun owners be punished because of one person who armed a dangerously mentally ill Son.

thank you for you time,

Alan Vosgerichian
