

Please consider banning all semi automatic weapons and high capacity magazines. Hunters do not need them. Gun enthusiasts do not need them for sport. They are for killing and killing only. No more children and educators should be needlessly killed. My children should not have to be afraid to go to school. As an educator, I should not have to look for closets to hide my students in, just in case someone comes in to shoot at us. Scotland banned these weapons after their school shooting. There have been no mass killings in Scotland since this ban. No Western country with our economic status has semi automatic weapons available to their citizens for everyday use. Why do we?
