

ASAFERCONNETICUT,

Please work to reduce assault weapons, multi bullet clips and increase background checks. We need to stop this madness. I was in Australia during the massacre and Australians were amazed that we would still allow guns to be so available. They had one massacre, did a voluntary buy back and numbers of guns reduced. When they made a suicide drug harder to access by putting it in pop out sheets rather than loose, the number of suicides went down. Making guns harder to access will not stop violence but it will help. Being armed for self defence means there are loaded weapons available and accessible to children and angry family members. The violence continues, deaths increase.

Please work to start to stop the violence.

Sincerely

Alison Laughlin
