

I do not support any bills that would further limit, either by registration or by financial means, gun ownership. It is useful to note that all but one of the mass shootings that have occurred in the United States have occurred in 'gun-free' zones; it is also useful to note that such shootings have occurred in countries which have far more restrictive laws concerning guns. We do not need to harass and punish law-abiding citizens. We do need to enforce the existing laws, we do need to ensure that background checks include all information from the numerous agencies, and we do need to ensure that our children are not defenseless. We are not sheep to be slaughtered at will. We need to be proud of our own lives, and part of that pride comes from being able to defend ourselves, our families, and the innocents in our charge. I do not support any bills restricting gun ownership.
