

>> I believe in our second amendment right, but I don't believe I'm arming civilians with killing machines. Military types of arms belong in the military, not in the hands of civilians. Please ban future sales of these weapons that are killing innocents in our country! There must be mandatory background checks for any gun. And background checks when the gun is transferred ownership in a private sale. All guns should have an annual registration renewal. Can you look in the eyes of an innocent child and feel that you have done everything you can to prevent their death from a weapon that has no business being in someone's home? Please act swiftly to stop these deaths from happening everyday. Treat this issue as if you lived in Sandy Hook CT and one of your children perished from this senseless act. Act with common sense and empathy!

>> Thank you!
