

I will no longer be silenced or bullied by those that believe they have the right to own semi automatic guns. They serve no purpose in our society.

I further support stricter guns laws that are enforced at the highest level . Primarily, extensive background checks, and a mandatory waiting period upon purchase of other guns. Those that consider themselves "responsible gun owners" should not be threatened by these new enforced laws , but be the leaders of this cause in light of the unspeakable massacre at Sandy Hook Elementary. The time is NOW to implement change for the safety of society. To not implement change at this point would be equally unspeakable.
