

www.cga.ct.gov/Here is what I think is going on instead of fixing the problem, it's to make more gun laws it makes politicians feel good, instead of Certain mental illness be put in a national data base, It's a Privacy issue with the liberal mind set.

Medical records would have to be exposed. Roe v Wade, Hipaa , and HIV Laws would have to be rewritten and that is the holy grail for these people. They don't have the will or the moral back bone to ever change those laws. It's in there DNA, Protect the sick in the country at all cost, these are just a few of the slippery slope items there concerned about. So we will continue to be confronted with mentally-ill people that will continue to kill us, we can not let them take our guns away to.

In the meantime, those teachers that have a carry permit be permitted to carry in the schools concealed if they wish with some training, and for GOD sake take down the GUN FREE ZONE SIGN !!!
