

I am a Redding, CT resident of eight years and a mother of three school-age children. I am writing today to urge you to take the necessary steps for sensible gun control and gun safety legislation in CT.

Registration of all guns and gun parts is absolutely necessary in Connecticut. Loopholes for purchases of parts to be later assembled must also be closed. We have little idea of what guns are really out there in our community.

Additionally, laws requiring responsible storage of guns are a most sensible way to keep us all safe. Gun owners must be required to accept responsibility for their guns.

thank you,  
Beth Mulcahy
