

I am in favor of a stonger Federal assault weapons ban and definitely a prohibition on high capacity magazine clips. I feel that citizens of a civilized society do not need assault weapons, used by our military on the battlefield, in their residences or places of employment. The definition of assault weapon should eliminate the possibility of manufacturers bypassing the ban with minor modifications. It should be required by law that background checks be completed for all firearms puchases, gun show and other private transactions or transfers. I am appalled at the comments made by leaders of the NRA.
