

We are long overdue to change the public conversation and policy as it relates to guns. The rights to weapons do not supersede the common good, nor should they be erroneously tied to concepts of freedom. America needs to stand for more than violence. Government needs to rise above the stream of misinformation and paranoid perpetuating of the old arguments.

I do not need a gun in my life.

I do not need a gun in my neighbor's hand.

I do not want to see another Sandy Hook.

Please take the prudent measures to protect your citizens and restrict access to guns and ammunition.
