

To whom it may concern,

I believe that there is room to enact additional gun control legislation without jeopardizing 2nd Amendment rights.

I believe there are controls that can be enacted that will reduce the likelihood and severity of gun related violence.

Any "industry" has the responsibility to control itself. Too bad for all of us when they do not. The gun industry has not stepped up to the task so someone (citizens and legislators) needs to step in.

I will educate myself and work to reduce gun related violence.

Sincerely,

Chris and Doug Winner
