

As a citizen of Connecticut, I wish to express my support for legislative measures that would ban assault rifles; that would require background checks on ALL gun purchases, including those made at gun shows; and that would otherwise control access to guns. I believe the second amendment was written for another time and that we need to update our understanding of the freedom to bear arms. Let's do all we can to work toward a safer and more peaceful society; restrictive gun control measures are one step in that direction.

All best,
