

To whom it may concern -

I am deeply saddened by the tragedy that occurred at Sandy Hook. Being a teacher myself, I began to really think about how truly safe my school is and how this tragedy could have been prevented. As we become divided, people are failing to realize the fact that bad people will still be able to get guns and ammunition no matter what harsh laws are imposed. Criminals nationwide are amused because of how close they are to becoming more empowered. Why is it that yet again RESPONSIBLE citizens are being attacked? Why aren't you putting together a task force to search for illegal weapons? This "comprehensive package of common sense measures" is only common sense to criminals and fails to make me feel safe at home and at my school. Please focus your attention on making schools safer from the inside out instead of outside in. I would also like you to allow me to protect myself in my own home from CRIMINALS. Because it is MY RIGHT. Taking this right away is UNCONSTITUTIONAL. In short, I strongly oppose stricter gun control on law abiding citizens and urge you to focus your attention upon stricter gun control for those who threaten us.

Thank you for your consideration,

Constance L. Duffy
