

To Whom It May Concern:

As a parent of a 5 year old child I am deeply concerned about the gun laws in this country and this state.

I am constantly appalled when I read opposing arguments to gun control. These gun advocates "rights" do not trump MY right to have a child and have him live free of harm at school, the movies, a mall, etc. There can be no circumstances EVER where it is more important for an individual to own an assault weapon over the life of a child.

I strongly urge you to pass legislation that bans assault weapons, these belong in the military, not in our homes. I also urge you to consider mental health screenings, extensive background checks and limits on ammunition rounds.

Respectfully,
Daniel Hagmann
