

How are you going to explain to the State Police and Local Police departments they cannot buy larger than ten round clips for the M16 full automatic, AR15 semi-automatic and all hand guns that hold over ten rounds ammo? You see the manufactures of the weapons and accessory will not sell to a State that place restrictions such as magazine capacity or types of firearms on the citizens of that State. But allow the State Police and Local Police departments to have these items. This is called the police loop hole.

What is the police loop hole? "There are some states, counties, cities, and municipalities in our great nation that fail to allow their citizens to fully exercise their right to keep and bear arms with restrictions such as magazine capacity or types of firearms. However, these government entities do not place these restrictions upon their own employees, such as police officers". We did not ask them to do this

See this web link for more information; <http://www.thepoliceloophole.com>

We did not ask them to do this and this is not a hoax, the gun companies known who there best customers are and who pays there bills and its not the State.
