

Im writing this e-mail to urge our law makers think long and and hard about legislation that is purposed on different bans that have been discussed on guns , ammo, purchase and resale .what I'm hearing on the news and talk among people makes me feel that law abiding ,tax paying hard working gun owners are being profiled as almost as criminals .As a member of this states society who obeys these laws that we have, trys to help people in need and help ones neighbor in need .i feel that our laws are being targeted at the people that i stated at the top of my writing and not enough laws to make actual crimals think twice about there actions and if they get caught how they will be penalized .Please dont penalize the lawful gun owners and the people that if need be had to defend there family ,property,state,and country from criminals or people trying to disturb society in a radical and insane way.Thank you for letting me weigh in on this subject and my common sense legislation be your guide.
