

To whom it may concern,

I am pleading with you to please amend the gun laws in Connecticut. Please be a leader in our country to take a stand against our current gun laws. Get the guns off our streets and let us be able to send our kids to a school, movie theater or mall without the worry of being shot. When the second amendment was written, the guns were muskets - not semi-automatic machine guns! Please, make the right decision for our State and our children.

Thank you,

Debby Rowland
