

To the CT State Legislators,

I sincerely hope the CT legislature listened and heard the voices of the people at the hearing yesterday. We law-abiding gun owners are no less devastated by the loss of precious life in Sandy Hook, but these proposed laws are unfair, unconstitutional, and completely ineffective at preventing such a tragedy from happening again. Please take into consideration your constituents. You are not only penalizing the wrong people with these laws, but this attack on the gun industry is going to take real jobs out of the state of CT. In addition, you will lose some decent, tax paying citizens such as myself, who will simply leave if the state enacts these laws. Of course, if the laws are passed and I choose to leave, it may not be before the next election, when I will surely remember who voted in favor of these attacks on my rights. Please listen to the CT people and not the flavor of the week out of Washington.

Sincerely,

Doug Warinner
